2. Project Summary

UniClass AI is a web-based learning management system for our university. Teachers can manage course materials, assignments, marks and attendance. Students can follow their own progress, and academic advisors get a weekly list of students who may be at risk of failing, together with the reasons, a suggested action and an AI-drafted message they can edit before contacting the student.

3. Responsibility Split

Member	Area	Main responsibilities
Sakib Hasan Anik	Database and AI (Team Leader)	Database design and Django models, demo data, AI risk model, explanations, LLM message, Git repository and final integration
Arnab Basu	Backend	Django REST API, login and role checks, file uploads, dashboard and analytics data, API documentation
Sarder Fariha Alam Trishna	Frontend	UI design, React pages for all four roles, dashboards and charts, connecting pages to the API
